CISD Essentials
The Bank of Ghana directive, kept in order all year

WHO IT'S FOR

Community and rural banks, savings and loans, microfinance, payment service providers and fintechs in Tiers 3 to 5 of the 2026 directive. Most don't need ISO 27001 certification (Tiers 3 and 5 can apply for an exemption; it doesn't apply to Tier 4), but every one needs the directive covered and the monthly return filed.

WHAT'S INCLUDED

- An Assurelo GRC workspace set up for your tier: only the directive paragraphs that apply to you, with Act 1038 and Act 843 alongside
- One onboarding session: owners named, your starter policies drafted, your first gaps ranked
- The monthly BoG incident return tracked, with reminders and a NIL-return check
- A Board report you can produce in one click
- A quarterly check-in with us: progress, new gaps, what the Bank is asking

YOUR PART

- A named compliance or IT lead
- About 2 hours a month, plus the quarterly check-in

FEE

A fixed annual fee, agreed after a free 30-minute call.

NOT INCLUDED

- ISO 27001 certification work (move up to Certify when you need it)
- Penetration testing
- Acting as your CISO

WHY NOW

The Bank of Ghana's 2026 directive applies to every licensed institution, scaled by tier, and the monthly incident return is due by the 15th, NIL returns included.
